# Cost effective dust control and road stabilization

Enjoying the comforts of a beautiful country home often involves driving down a rutted, dusty road that's anything but comfortable. Dust-Off® dust suppressant makes it easy to control dust and stabilize private roads – increasing the comfort and value of your home in the process.

## Stabilize Roads, Reduce Repairs

Gravel and dirt roads treated with Dust-Off® stay in better driving condition – requiring fewer repairs and less maintenance.

## Cleaner Air, Cleaner Everything

Dust-Off® keeps dust out of the air and off of your cars and trucks. It also helps keep that lovely house at the end of the road cleaner, too.

## Create a Healthier Environment

Road dust can contribute to asthma and other health problems. Dust-Off® helps reduce airborne particulates, helping to create a healthier environment.

## Keep Family & Friends Safe

Windblown dust can restrict visibility and cause accidents. Dust-Off® improves visibility and keeps your private road safer to travel.

## Increase Your Property Value

Attractive, well-maintained roads increase the value of your property. Dust-Off® helps ensure that your road stays in tip-top shape at all times.

## Improve Your Lifestyle

You own a country or mountain home for the lifestyle it affords. Make that lifestyle even more enjoyable with Dust-Off® dust suppressant.

Keep Dust Down and Costs Low. Contact your local Dust-Off® distributor to learn more or call Cargill Salt at 1-888-385-SALT (7258).
